11/24/75

Mr. Weisberg,

I listened to WOKY in Milwaukee and heard you on the radio. At first I was a little bit sceptable about what you were saying. The next weekend on the David Susskind Show they had six men who discussed the Kennedy Assassination plot. The only one I remember was David Belin. He said the Warren Commission was "totally correct in its finding". Whenever somebody tried to bring up a point against it, such as denouncing the one gun, one bullet theory. He went into a frantic rage right on television. It was almost shocking. As I listened though the truth started to come as it should. Oswald didn't act alone. I personally wouldn't be surprised if he didn't shoot the President at all. On a local program in Milwaukee a man named David Gregan one on one he showed the Zapruder Film. The minute I saw Mr. Kennedy's head fire backwards I new there must have been a shot from in front of him. He went through it very slowly the next time. He showed the

outline of a man. On your show on WOKY you said it was false. I believe you, But next time you look at the copy of Z apruder film at the precise spot where the outline ~~~ is, look a little bit to the right and down. It looked to me like a head and shoulders. I'm just trying to help you in any way I can because I totally believed in what you are doing. I am sending some clippings from Milwaukee newspapers about the tragic incident. If 70% of the American public thinks there is something wrong I think they should open up the findings of the Warren Commission and solve it for once and all.

Good luck in your ~~~ work,

a friend.

P.S. Write back because I want to know if you received the articles I sent you.

My parents saved the Milwaukee Journal Newspapers and Chicago Tribune. If you want the papers I will send them to you. They have names of 2 boys who saw the assinnation 10 feet from Kennedy's car. My address is on the other letter. I will watch the show on CBS tonight. I also respect very much what you are doing.
